HIGH PERFORMANCE ENTRANCE MATTING

High Performance Entrance Matting for:

COMMERCIAL OFFICE

Corporate Headquarters etc.

The entrance to your corporate headquarters should be synonymous with your business identity, making an instant impression on both employees and guests. INTRASystems is proud to be the market leader in the design of entrance matting and architectural grilles for commercial environments, assisting specifiers to achieve the full potential of their vision, with no compromises to design or functionality.

Traffic levels can vary greatly depending on the building's capacity, but your entrance offers excellent scope for aesthetically impressive entrance matting design. As the reception area effectively portrays the company values or the buildings' distinction, so the entrance matting can be used to support and enhance these standards.

Efficient performance, longevity and ease of maintenance are essential for every area, and when combined with an innovative design, make way for some of the most exciting installations.

SPECIFICATION GUIDELINES

System Specification	Hardwearing material such as Stainless Steel, aluminium or PVC, with high performance inserts. External matting recommended with rubber inserts, combination rubber and polyamide fibre inserts within circular doors, and polyamide fibre inserts internally
Matwell Size	Matwells should cover the full width of the entrance doors and recommended to extend between 4-8m in the traffic direction. Where matwell size is restricted, surface bonded high performance fibre can be considered for increased performance
Volume of Traffic	Medium to High, depending on size/capacity of the building
Type of Traffic	Heavy wear: Foot traffic / Wheeled briefcases / Wheelchairs etc.
External Environment	Often exposed areas with hard surfaces – prevention of moisture ingress is primary
Internal Environment	Effective soil & moisture removal for protection of internal floor finishes and the prevention of slips on hard floors due to surface moisture

INTRAflex XT

The flagship Heavy Duty aluminum matting product

INTRAform

Heavy Duty 17mm aluminum plank system

INTRAform Low Profile

Heavy Duty 12mm aluminum plank system

INTRAform DM

Heavy Duty 17mm aluminum plank system with double width-inserts sections

INTRAform DM Low Profile

Heavy Duty 12mm aluminum plank system with double width-inserts sections

INTRAflex Radial

A unique curved system for optimum aesthetics

INTRAgrille

Stainless steel grilles for unique applications

INTRAflow

Heavy Duty Aluminium Entrance Matting for highly efficient moisture removal and drainage

INTRAflow Plus

Heavy Duty 17mm aluminum plank system with double width-inserts sections

INTRAform FR

Specialist system for high fire risk areas

INTRALink

Heavy Duty 16mm interlocking tile system

INTRALink Low Profile

Heavy Duty 12mm interlocking tile system

INTRAbrush

High quality bristle brush Entrance Matting for external applications

INTRALux Fibre

Range Includes INTRALux Select, Elite, Linear, Ultima, Premier, Grafic & Rib
