HIGH PERFORMANCE ENTRANCE MATTING

High Performance Entrance Matting for:

PUBLIC BUILDINGS

Museums, Civic Offices, Theatres, Event Areas

From grand exhibition halls to noble museums and opulent theatres, public buildings must stand up to both potentially high traffic and the critique of the public eye. We keep the desired character of your building in mind, alongside safety and performance requirements, to find you the perfect INTRAsystems solution for your building.

Being areas of public focus, safety, performance and the aesthetics of any entrance matting is paramount. Traffic levels vary between locations, so careful consideration of the most appropriate matting system must be taken.

Access for disabled persons needs to be safe and easy, and suitable matting should be considered for areas with wheeled access, ensuring the matting extends in travel direction across a distance that is greater than the circumference of an average wheelchair's wheel.

SPECIFICATION GUIDELINES

System Specification	Hardwearing material such as aluminium or PVC, with high performance inserts. External matting recommended with rubber inserts, combination rubber/fibre inserts within circular doors etc, polyamide fibre inserts internally
Matwell Size	Matwells should cover the full width of the entrance doors and recommended to extend between 5-8m in the traffic direction. Where matwell size is restricted, surface bonded high performance fibre can be considered for increased performance
Volume of Traffic	High to Extreme wear: with concentrated traffic flow during peak periods/event days etc.
Type of Traffic	Heavy Wear – Foot traffic / Wheelchairs / Mobility Scooters etc.
External Environment	Often exposed areas with hard surfaces – prevention of moisture ingress is primary
Internal Environment	Effective soil & moisture removal for protection of internal floor finishes and the prevention of slips on hard floors due to surface moisture

INTRAflex XT

The flagship Heavy Duty aluminum matting product

INTRAform

Heavy Duty 17mm aluminum plank system

INTRAform Low Profile

Heavy Duty 12mm aluminum plank system

INTRAform DM

Heavy Duty 17mm aluminum plank system with double width-inserts sections

INTRAform DM Low Profile

Heavy Duty 12mm aluminum plank system with double width-inserts sections

INTRAflex Radial

A unique curved system for optimum aesthetics

INTRAgrille

Stainless steel grilles for unique applications

INTRAflow

Heavy Duty Aluminium Entrance Matting for highly efficient moisture removal and drainage

INTRAflow Plus

Heavy Duty 17mm aluminum plank system with double width-inserts sections

INTRAform FR

Specialist system for high fire risk areas

INTRALink

Heavy Duty 16mm interlocking tile system

INTRALink Low Profile

Heavy Duty 12mm interlocking tile system

INTRAbrush

High quality bristle brush Entrance Matting for external applications

INTRALux Fibre

Range Includes INTRALux Select, Elite, Linear, Ultima, Premier, Grafic & Rib
